

Site numbers are read as follows;

- The first letter denotes the area
- The next letter denotes row
- The number is the placement in the row.

Example

Stanley Lay can be found at **B-B013**

B= Baptist section

B for row

013 is site 13 in the row, in this case the count is from the roadside

It can take a little while to work out the rows and which end the numbering starts, if the office is open help is available.

The Cemetery Database is also online and can help with locations.
